ÁLVARO RODRÍGUEZ MOLINA

SOFTWARE ENGINEER | FULL STACK, INTEGRATION & AUTOMATION

+353 85 818 7983 alvrodmol@gmail.com EU driving licence

PROFESSIONAL EXPERIENCE

Fusion Analyst | Full Stack & Automation

Synovia Digital

01/2026 - Present Ireland (Remote)

- Built a customs operations platform for several private logistics clients, filing GB–NI declarations through the API of HMRC's Trader Support Service (TSS).
- Automated how shipment data comes in: emails read through Microsoft Graph, Excel uploads and a web portal, with the data extracted, validated and pre-filled.
- Built an internal platform for support and operations teams, with Microsoft Entra ID sign-in, role-based access and ticket analytics.
- Created jobs that repair missing Snowflake data straight from the SAP S/4HANA API, with automated reports.
- Developed Python backends (Flask and FastAPI) on Azure SQL, deployed with Docker.
- Helped define architecture, repository structure, deployment and development standards, and shared knowledge across the team.

AI Visual QA Specialist

Mercor (Remote, Freelance)

07/2026 - 08/2026 Ashbourne, Ireland

- Reviewed layout, typography, spacing and visual hierarchy of AI-generated presentations for professional use.
- Evaluated AI-generated writing and gave rubric-based feedback to calibrate outputs against human quality standards.

Multimodal AI Training Specialist

Outlier (Remote, Freelance, Part-time)

11/2025 - 02/2026 Ashbourne, Ireland

- Created video, image, audio, and text content to simulate AI-generated outputs and provide human feedback for training multimodal AI models.

IT Business Consultant & SAP Analyst

Primeline Group

05/2025 - 01/2026 Ashbourne, Ireland

- SAP S/4HANA EWM support and warehouse process management.
- Trained 3 end-users on SAP S/4HANA, boosting adoption rates.
- Optimized SAP S/4HANA workflows, improving process efficiency.

System Admin

Primeline Group

11/2024 - 05/2025 Ashbourne, Ireland

- Managed order distribution, system updates, and shipment coordination to ensure timely deliveries and KPIs (Gaina Software).
- Conducted data analysis and reporting using Excel.
- Optimized workflows and team performance through effective communication on Microsoft Teams.

PROFILE

Software Engineer working across full-stack development, SAP S/4HANA EWM, automation and AI. I enjoy being involved in both the technical and business sides of a project, from understanding an operational problem to building the software that solves it. I regularly work with sales and operations teams, turning their requirements into tools they can actually use. I have developed AI agents and automation tools for troubleshooting, data processing, analysis and reporting, as well as APIs, authentication flows and Azure-based applications. I also have experience in multimodal AI training, system administration and warehouse operations.

Junior Programmer Intern
Getronics

04/2024 - 07/2024 Seville, Spain

- Performed Java testing with Spring Boot, JUnit, and Mockito for Notific@, a government notification system.
- Identified and resolved software bugs, improving product stability.
- Implemented frontend and backend improvements to increase application stability and scalability.

Sales Team Lead | Energy Advisor
Stratton Global

01/2023 - 04/2024 Seville, Spain

- Managed multiple clients using various energy company CRMs.
- Helped over 10 major businesses reduce energy costs by adjusting rates through comparative and efficiency studies, ensuring fair payment.
- Led a team of 3 advisors, coaching them in sales methodologies.
- Analyzed market trends to advise clients on sustainable energy solutions.

Store Clerk & Digital Manager
El Tortillón (Family business)

07/2019 - 09/2022 Seville, Spain

- Managed the shop's social media, created its digital content and designed branding.
- Increased interaction on social platforms by 25% over 6 months with consistent posting and new branding.

EDUCATION

Specialist in Web Application Development
I.E.S. ALIXAR

2022 - 2024 Seville, Spain

- Full-stack web development: designing, building and deploying modern applications from both frontend and backend perspectives.
- Software architecture, design patterns and database management, with hands-on work on APIs, cloud environments and containerization.
- Documented projects across client-side and server-side development, databases and development environments.

Degree in Computer Engineering
University of Seville (ETSSII)

2019 - 2024 Seville, Spain

- Theoretical and practical foundations of computing: programming, algorithm design and analysis, binary systems, logic gates and digital circuits.
- Applied mathematics (algebra, calculus and statistics) for data structures, computational models and system design.

Technological Bachelor's
School Inmaculado Corazón de María Portaceli

2017 - 2019 Seville, Spain

SKILLS

Programming Languages:
Python, Java, JavaScript, TypeScript, SQL, HTML, CSS

Frameworks / Libraries:
FastAPI, Flask, Django, Spring Boot, Spring Security, React, Angular, Node.js, Express, JUnit, Mockito, Pandas

Cloud, APIs & Deployment:
Azure (Azure SQL, Functions, Blob Storage), Microsoft Graph, AWS, REST APIs, Swagger, Docker, Render, Vercel

Authentication & Security:
Microsoft Entra ID, OAuth2, JWT, Role-Based Access, HTTPS, CORS

Databases & Data:
PostgreSQL, Azure SQL, MySQL, MongoDB, Snowflake, Power BI, Excel

Development Tools:
GitHub, GitHub Actions, GitLab, Jira, Postman, VS Code, IntelliJ IDEA, PyCharm

Applications & Services:
SAP S/4HANA (EWM), Microsoft 365, SharePoint, ServiceNow

Modeling & Documentation:
UML, ERD, Architecture Diagrams, Wireframes, Technical Documentation

Methodologies:
Agile, Scrum, CI/CD

AI:
Generative AI, Claude API, Human-in-the-Loop, Multimodal Data Annotation, AI Output Evaluation

VOLUNTEERING

Community service and support
Blanca Paloma School

2021 Los Pajaritos, Seville, Spain

- Charity market and collaboration with the food bank.

SELECTED PROJECTS

MonsterBroker
monsterbroker.onrender.com

- Crypto trading bot with paper trading on live Binance data and signals reviewed by Claude.
  Python, FastAPI, React, JWT, Docker

Spain Motorcars
spainmotorcars.vercel.app

- Website for a car dealer: inventory, services and buying process, in two languages with a dark mode.
  HTML, SCSS, JavaScript, Webpack, Vercel

Stratton.app
Final degree project

- Client-management app for an energy advisory firm, with a secured REST API.
  Java, Spring Boot, Spring Security, Angular
